BIO

Colleen Wild and the Haunted is a hard rock band native to the Chicagoland area. Lead singer Colleen Wild has been active in the music community for over 10 years, a staple to the independent music scene in the area. The band features other notable members, Joe Nevills and David Tilghman Jr. Nevills was a former drummer for the successful metal band, Born of Osiris, while Tilghman showcased his impressive bass skills as Wesley Belmont.

Rounding out the band are David Francis and Josh Nestor, a guitar duo that combine to melt faces with impressive solos and chord combinations that make your ears perk up. While the band touts experienced members, they have just begun to release music. Their first EP, "Nest" includes some of the songs they originally wrote together without the final band in place. Their latest single, "Savior", is the first off their first studio album. The song has gone on to amass nearly 800 streams within the first two weeks. Known for their impressive live show presence, the band has been featured in several larger music festivals, such as Hong Kong Pizza Party (where they headlined in 2024) and Oktoberfestiversary in addition to playing in popular Chicago venues, such as Cubby Bear.
